► Galvanized steel base with measuring grid.
► Accurate steel side gauge with measuring scale.
► Machined aluminum back gauge with brass locking knob.
► Automatic blade safety lock.
► Non-skid feet.

SAVES MONEY

With print shops charging several dollars per cut, the machine, at a comparable price to a guillotine paper cutter, pays for itself and saves you time and money.

APPLICATIONS

Cuts and trims: copier paper • printer paper • photo paper • scratch book • note pad • card stock • rubber pad • plastic sheet

Ideal for: schools • churches • print shops • photo shops • copy centers • business offices • publishing services

SAVES TIME

If it takes you hours to cut a stack of paper with a guillotine paper cutter, by using a QCM Portable Stack Paper Cutter, you will get the job done within minutes. QCM Desktop Stack Paper Cutter saves you time, by over 90%, and yields prefessional and precise results.
